## **10-Inch Open Frying Pan**

A simple yet versatile frying pan you'll use every day. The heavy-gauge aluminum body spreads heat fast and evenly, while the DuPont non-stick coating keeps food from sticking for healthier cooking and easy clean-up. The bakelite handle stays cool to protect your hands. Cook over low to medium heat, and use wooden, plastic, or silicon cooking utensils. This pan is dishwasher safe but hand-washing with non-abrasive detergent is recommended.

## **Five-Quart Dutch Oven**

This heavy-gauge aluminum Dutch oven is great for soups, stews, or a hearty pot roast. Both the Dutch oven and its clear glass lid come with heat-resistant bakelite handles to keep your hands safe. The interior is coated with DuPont non-stick (wooden, plastic, or silicon utensils are recommended) so clean up is a breeze. You can put this Dutch oven in the dishwasher, but the finish is better protected with hand-washing in non-abrasive detergent.

## **One-Quart Open Saucepan**

Everybody needs a little non-stick saucepan like this one, in sturdy heavy-gauge aluminum with a heat-resistant bakelite handle. Protect the DuPont non-stick coating by using only silicon, plastic, or wooden cooking utensils, and hand-wash with non-abrasive detergent (OK, you can put it in the dishwasher, in a pinch). Cook over low to medium heat, and avoid heating the pan when it's empty.

## **Two-Quart Covered Saucepan**

So versatile! This two-quart covered saucepan will be used by gourmet and home cooks alike. The heavy-gauge aluminum body spreads heat evenly for fast and trouble-free cooking. Your hands are safe with the heat-resistant bakelite handle. The DuPont non-stick coating keeps food from sticking and makes clean-up so easy. Cook with low to medium heat, and don't heat the pan empty. Protect your pan by using only wooden, silicon, or plastic cooking utensils. While the saucepan is dishwasher safe, hand-washing with mild detergent is recommended.

## **Three-Quart Covered Saucepan**

You'll reach for this three-quart saucepan again and again. It has a heavy-gauge aluminum body for even cooking, heat-resistant bakelite handles, and a non-stick coating by DuPont for healthier cooking and easy clean-up. We recommend cooking over low or medium heat, and heating the pan when it's not empty. Keep your non-stick coating in good condition by avoiding metal cooking utensils (wood, silicon, or plastic only, please). Both pan and glass lid are dishwasher safe, but for best results, hand wash in non-abrasive detergent.
