

## Jamie Oliver Recycled Glassware

Jamie Oliver's line of recycled glass tableware reflects his commitment to improving our environment and the way we live in it. Now available from Heritage Mint, you'll find beautiful products made of 100 percent recycled glass. Where once were only used wine bottles or marmalade jars, today there are plates, bowls, glasses, even tea-light holders. The subtle differences in shape and surface reflect the recycling process. The result? Each piece is completely unique, with the distinctiveness and character that Jamie values so much.
